

Module schedule

Each week a two hour computer practical session is timetabled, but you should also expect to spend a significant amount of time in self-directed study. Pay attention to Blackboard announcements, which will direct you towards the relevant reading and preparation for each week. There is additional material, each week, on Blackboard for your study - sometimes this is released after class.

Week	Topic
Start	Getting started with R
1	Introduction to R
2	Reproducible research with Rmarkdown
3	Exploratory data analysis: summarising and visualising data
4	Hypothesis tests (1)
